

Study Plan

Academic and Work Background: I completed my undergraduate studies in Computer Science, at ~~Howard North American University, Cotonou Benin Republic~~, In August 2017 with a CGPA of ~~2.5~~ out of 4.00. I was an active indulgent student among others during my undergraduate studies, very often involved in various curricular and co-curricular activities. If observed by my meritorious efforts, I remain very competent and I have passed all entrance tests conducted by the academic institution of my education with high achievements. I did my final year thesis project on “Statistical Estimation of the Impact of ICT in Health Information Management: A Case Study of Federal Medical Centre Yola, Nigeria” under the assigned University’s supervisor. I recently completed a one-year National Youth Service Corps at Independent National Electoral Commission(INEC) Headquarters, in Abuja Nigeria. I worked as a Data Administrator and Also Monitored the 2019 and 2023 General Elections. Furthermore, I have done an internship during my undergraduate studies at the Independent National Electoral Commission(INEC) Headquarters for the duration of six (6) months, I have participated in various elections that were carried out as Technical Support, through all this, I can say I have gained quality knowledge within my field and even beyond.

My Personality: In fact, I am a social person and a good communicator. I keep a keen view of the reality of life and thus approach people with a positive mind and attitude and always prove to be helpful with honest efforts and true dedication. Besides that, I always feel very fortunate and happy to meet and interact with people from different backgrounds and cultures. As such meetings are always important because they prove to be beneficial in the future also it makes things easy to cope with whether one work/study within or diaspora.

Study Plan for a Master's Degree in Safety Science and Engineering: I would like to apply for the Master’s Degree in Safety Science and Engineering in China because my background in computer science will help me understand complex safety systems given that it has enhanced my analytical and problem-solving abilities.

I intend to use my computer science bachelor's degree to my advantage by enrolling in optional courses that look at the relationship between computer science and safety engineering. During the first year, I'll take courses in risk assessment, hazard analysis, and safety management to lay a strong foundation in safety. My experience in computer science strengthens my analytical abilities and helps me to comprehend intricate safety systems. The second year is dedicated to research projects that examine laws, create risk assessment techniques, or innovate safety technology. Data-driven safety solutions will be made possible by my data talents. I'll do an internship with a business that prioritizes safety so I can put my academic understanding to use. My background in data administration will improve organization and teamwork. I'll combine data management expertise with safety principles in my role as a data administrator to address data security, risk, and compliance. My teamwork and communication skills will get better through group projects, which are crucial for transdisciplinary safety challenges. I'll use my

special skill set after graduation to contribute to research initiatives, data-driven safety innovations, and safety-critical software.

Reasons to study in China: Now the question arises, “Why China?” Reading the books, watching the news, and analyzing and observing the people of China, I am impressed by the way, these individuals have proved themselves to be dedicated to their work, and with true efforts they have set China as a successful example for the other third world or developed countries. The fast-growing economy, technological advancement, and the global ranking of education institutes in China with high reputations make a great aspiration for students and professionals for better career perspectives. Thus, such kind of positivity has boosted my confidence further and I am highly satisfied with the decision I have taken. Moreover, China’s diverse cultural norms and values, the famous gentle hospitality of its people, and Nigeria-China all weather friendly relations, acceptance, and peace to both sides in great clarity make me feel China is a great place; also my family fully supports my choice for China being my preference for graduate studies. All these reasons put together make China an ideal place for me to do my Master’s Degree. Concluding it, with high hopes I believe this application will receive your favorable consideration for admission and I will be happy to provide any additional information you may require.
